Fit for a *Little* Princess

BY JOY LIEDTKE

Joy and Shaun gave their daughter a practical yet beautiful nursery

SPECIAL MEMORIES

The toys in my daughter Evangeline's room are special. I chose them during pregnancy and they remind me of that wonderful time.

A ROOM THAT LASTS

I chose a timeless look for Evangeline's room. I want this room to last her well into her childhood. The colour palette is white and blue-grey with touches of pink. Calming and neutral colours are always best as they have longevity. I used dark wood furniture to add warmth to the room. Choose furniture that doesn't have sharp edges, and has been painted with organic or child friendly paint. The space between cot slots should not be more than 10cm - you don't want baby getting their head or limbs stuck in them. Mobiles are a great addition to any nursery as they add interest and stimulate baby's eye movements. I custom made the mobile above Evangeline's cot and attached it to a mosquito net. This created a stunning focal point in the room.

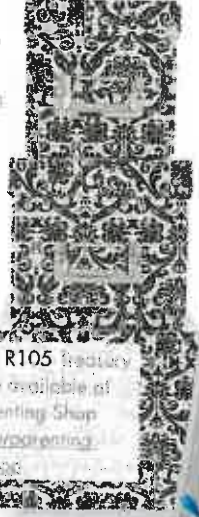

décor

CLUTTER FREE
 I keep things behind closed doors or boxes. Store items and leave a few things on display. Use built-in cupboards to the fullest capacity (add in a second rail to allow for more hanging space). Compactums can store a lot of baby's goodies. Add labels to boxes for specific items and keep them packed away on higher shelves that baby cannot reach. Hooks are also great. Add them to hang hats, toys or bags.
